Description

The S8000 Three Phase generator is fitted with the Honda GX390 4 stroke petrol engine. This Electric Start Three phase Generator is Ideal for Industrial, standby and domestic use, open framed with long run tank and wheel kit. Also available as Single Phase.

The ideal generator to use in residential areas or outside normal working hours. Low noise levels, built in plug for AMF or remote control, mean this generator is equipped and ideal for use as a domestic back up power supply.

Auto voltage regulation (A.V.R) fitted to this generator. The AVR smoothes the output power; removing any spike or surges. This guarantees the quality of power coming out the generator. This allows you to run sensitive electronic equipment off this generator without any risk of damage.

This generator is fitted with the pramac '+ CONN' socket. This means the generator is pre-wired to accept a pramac automatic mains failure (A.M.F) panel. When used in conjunction with the optional AMF panel, the generator will automatically start in the event of a power-cut and switch mains supply to the generator. When mains is available again it will do the reverse and switch off. A.M.F is available as and optional extra (See package option).

Features

- Electric Start
- Magneto Thermal Protection
- Oil Guard System
- Voltmeter and Hourmeter
- Battery Charger
- 1 x SHUKO Socket

- 1 x 400V 16A Socket

Specification
